

The AQUABOX “GOLD”

The **Aquabox Gold** is a special version of our Standard Aquabox. It is packed by the Aquabox team and filled with new, specially purchased, humanitarian goods to meet the basic needs of the recipients of our Standard Aquaboxes..... and more.

.... And in doing so, the box is filled to capacity bringing the weight up the maximum shipping weight of ~25kg.

This option nudges Aquabox into a new era, one where our supporters can fund the filling of Aquaboxes with a wide range of new, non-clothing. We now limit our capacity to service Aquabox Gold within our existing premises mainly on the grounds of cost pressures.

This new product is in response to a number of our sponsors who have commented that they sometimes find it difficult to fill as many boxes as they would like. By centrally purchasing the goods on a wholesale basis, we are able to offer a very financially attractive alternative to Standard Aquaboxes since we can allocate the cost of Parcelforce transport of the Standard Boxes around the UK towards the cost of purchasing of the aid items.

The **Aquabox Gold** humanitarian aid packing list exceeds our basic recommended “Standard Aquabox” packing list. It includes at least another ten items or so together with an AquaFilter Family water purification unit capable of producing 18,000litres of potable water, enough water for a family of six for well over eighteen months, including general hygiene water. The Aquabox Gold does not include clothing.

Should the demand for Aquabox Gold outgrow our existing local supporters and/or warehouse capacity, then we will need to look to find alternative ways of meeting this demand.

An **Aquabox Gold** plus contents;

- AquaFilter Family
- muslin,
- One tap
- 2 survival bags
- “Instructions” cartoon”
- Filled with new, specially purchased, humanitarian goods
